

ProAc RESPONSE ONE POINT FIVE

Audiophile excellence in a new slimline floorstanding design.

The new ProAc Response One Point Fives deliver the customary high quality of Response range specification through an affordable floorstanding design.

These slim and elegant cabinets generate a wonderfully natural sound, fast and detailed throughout the frequency range, yet with a muscularity which gives full weight to dynamic programme.

A new 6½" bass/midrange driver produces impressive bass control, power handling and midrange detail. This drive unit has been ported to provide convincing low frequency extension with a clean and open midrange.

The bass and midrange are mated seamlessly to the now famous ProAc ¾" soft dome tweeter, which is used exclusively throughout the Response range. This remarkable unit is unrivalled in the smooth, sweet and detailed sound which it creates.

Response range build quality is now a byword. The drive units together with the sophisticated crossover network are housed in high density MDF panels of varying thicknesses, heavily damped with bitumen and lined with anechoic grade foam. All cabinets are finished with real wood veneers.

The One Point Fives offer the traditional ProAc strengths of pinpoint imagery and spacious soundstaging, delivered with a beguiling musicality which will satisfy the most discerning music lover.

SPECIFICATION

Nominal Impedance:	8 ohms
Recommended Amplifiers:	20 to 180 watts
Frequency Response:	30hz to 30Khz
Sensitivity:	88db linear for 1 watt at 1 metre
